

Job Description: Fresher Solution Engineer

Company: Virtuos Digital Engineering

Program: Springboard Program

Location: Gurgaon—Work From Office (WFO)

Job Type: Full-Time

About Us: Virtuos Digital Engineering is dedicated to recruiting top-notch engineers from reputed engineering colleges and universities through our Springboard Program. We groom, nurture, and develop engineers to possess extraordinary skills in cutting-edge and modern applications such as CRM, CLM, EX, and collaboration tools. Our engineers work on the solutioning of applications, integrations, and the development of add-ons, connectors, and accelerators for leading OEM applications like Salesforce, Oracle, Microsoft, Agiloft, and others.

Job Overview: As a Fresher Solution Engineer, you will be part of our dynamic team, focusing on the development and customization of advanced business applications. You will engage in solutioning, integration, and development tasks, contributing to the success of various projects.

Key Responsibilities:

- Develop and customize applications using Fullstack Apps and low-code platforms.
- Design and implement front-end solutions with HTML, CSS, JavaScript, and jQuery.
- Create and manage back-end components using C# and .NET framework.
- Integrate applications with REST/SOAP APIs and middleware solutions.
- Participate in data modeling and database management using SQL.
- Enhance user experience with Ajax for asynchronous web applications.
- Contribute to the development of add-ons, connectors, and accelerators for marketplace applications.
- Ensure code quality and maintainability through best practices and code reviews.
- Collaborate with cross-functional teams to gather and analyze business requirements.
- Stay updated with the latest industry trends and advancements.

Qualifications:

- Bachelor's degree in Computer Science or related field from a reputed engineering college/university.
- Strong understanding of web technologies including HTML, CSS, JavaScript, and jQuery.
- Proficiency in C#, .NET, and SQL.
- Knowledge of Ajax for dynamic web applications.
- Familiarity with data modeling concepts and practices.
- Excellent problem-solving and analytical skills.
- Strong engineering bent of mind and aptitude for learning new technologies.
- Effective communication and teamwork skills.

Preferred Skills:

- Logical Reasoning and Analytical Skills to implement No Code Platforms.
- Knowledge of CRM, CLM, EX, and collaboration tools.
- Understanding of REST/SOAP APIs and integration methods.
- Basic knowledge of Agile and Scrum methodologies.
- Participation in coding competitions or hackathons.

Benefits:

- Comprehensive training and mentorship through our Springboard Program. •
- Opportunities to work on cutting-edge technologies and high-impact projects. •
- Collaborative and inclusive work environment.
- Competitive salary and benefits package.
- Career growth and development opportunities.

How to Apply: Interested candidates are invited to send their resume and a cover letter detailing their relevant experience and interest in the position to ayushi.chandra@vdc.com
